PROJECTS / OPEN-SOURCE

Portfolio | Link   *React, Next, Typescript, Bootstrap*
- Designed and developed a responsive and user-friendly portfolio website to showcase my skills and projects.
- Incorporated various design elements such as typography, color scheme, and layout to create a visually appealing website.
- Utilized Git for version control, and successfully deployed the website on Vercel.

Crossy Survivor | Link   *Unity, C#*
- Led a group of 5 classmates to build a 3D crossover of Crossy Road and Vampire Survivor as a part of the Game Mechanic course.
- Implemented features such as character controllers, path finding, UI and procedural content generation.

Colour Palette Generator | Link   *React, Bootstrap, Material UI*
- Designed and developed a responsive web-based color palette generator.
- Programmed features such as color gradient generation, color picker and ability to save color palette.

Shifty | Link   *EJS, Bootstrap, Express, MongoDB*
- Collaborated with 4 classmates to implement a full-stack web application for restaurant scheduling as a part of Intermediate Software Engineering class.
- Implemented employee availability input, shift swapping, time-off requests, schedule sharing and conflict resolution features.
- Utilized agile development methodologies to deliver a high-quality, polished final product.

YelpCamp | Link   *EJS, Bootstrap, Express, MongoDB, Cloudinary, Mapbox*
- Built a web application for campground reviews and information.
- Implemented user authentication, authorization and comment features.

Hurdle | Link   *HTML, CSS, Javascript, Express*
- Built a web-based word game similar to Wordle.
- Created a game which randomly generates a word and the player has to guess the word by entering letters.
